The Directive on the Promotion of the Use of Energy from Renewable Sources in Lithuania (2012/27/EU), which mandates the adoption of national renewable energy action plans and

Implemented effectively, Lithuania's strategies and plans can guide it towards a more secure, sustainable and prosperous energy future.

This report seeks to provide Lithuania with timely advice on how it can progress towards its energy goals, including in two focus areas: expanding the electricity system and decarbonising transport.

EPSO-G is a state-owned group of energy transmission and exchange companies. The shareholder rights and obligations of EPSO-G holding are implemented by the Ministry of Energy of the Republic

As Baltic nations accelerate their green transition, Lithuania stands out with pioneering container energy storage projects. These mobile power solutions are redefining how we store and distribute renewable

The following page lists the largest power stations in Lithuania. Two RBMK reactors. Decommissioned in 2009. The first power station in Lithuania. No longer active.

Results show that Lithuania has sufficient renewable energy potential, flexible generation capacity, and interconnection with neighboring European Union countries to reliably meet projected 2030 electricity

This includes licensed or permit-regulated activities for independent power supply and aggregation, transmission, distribution, public supply and electricity generation, as well as permits for the
